## LIVESTOCK SLAUGHTER, MEAT AND LARD PRODUCTION, 1962

Production of red meat during 1962 was 28,961 million pounds, up 1 percent from 1961, according to the Crop Reporting Board. Beef production during 1962 was 15,296 million pounds--approximately the same as the 1961 production of 15,298 million pounds. Veal production was 1,015 million pounds--3 percent below the 1961 production of 1,044 million pounds. Lamb and mutton production was 809 million pounds--3 percent less than the 1961 production of 832 million pounds. Pork production was 11,841 million pounds--up 4 percent from the 1961 production of 11,411 million pounds. Beef accounted for 53 percent of the total red meat production in 1962, while pork made up 41 percent. Veal and lamb and mutton each accounted for 3 percent. Lard production was 2,480 million pounds during 1962, compared with 2,517 million pounds a year earlier.

The number of cattle slaughtered in 1962 was 2 percent above 1961. Cattle slaughtered under Federal inspection were 2 percent more than a year earlier and other commercial slaughter was up 1 percent, but farm slaughter decreased 1 percent. Calf slaughter in 1962 was down 3 percent. Slaughter of calves under Federal inspection decreased 1 percent, other commercial slaughter decreased 7 percent, and farm slaughter decreased 5 percent. The total number of sheep and lambs slaughtered in 1962 decreased 2 percent from a year earlier. The number of sheep and lambs slaughtered under Federal inspection was down 2 percent, farm slaughter was down 3 percent, but other commercial slaughter was approximately the same. The number of hogs slaughtered in 1962 was 2 percent more than in 1961. Slaughter in Federally inspected plants increased 3 percent but other commercial slaughter decreased 1 percent and farm slaughter decreased 10 percent from the previous year.

Slaughter cattle averaged 10 pounds lighter than a year earlier; calves averaged 1 pound lighter; sheep and lambs averaged 1 pound lighter; but hogs averaged 1 pound heavier.

Slaughter in Federally inspected and other commercial plants is included in the monthly estimates. Farm slaughter estimates are on a quarterly basis only. The farm slaughter estimates have been revised for 1961.

Rank of States by number of head slaughtered in commercial slaughter plants for each species is shown for the first time in this publication.

This report is made possible through the cooperative efforts of the Meat Inspection Division, Agricultural Research Service; the Livestock Division, Agricultural Marketing Service; and the Statistical Reporting Service.
